- See Section 12 for additional ecological information

**Methods and material for containment and cleaning up**

- Methods for containment**
- Contain spill with an inert absorbent material such as soil, sand or oil dry.
  - Prevent from spreading by covering, diking or other means.
- Methods for cleaning up**
- Use personal protective equipment as required
  - Take up mechanically, placing in appropriate containers for disposal
  - Clean contaminated surface thoroughly
  - Dam up
  - Cover liquid spill with sand, earth or other non-combustible absorbent material

**7. HANDLING AND STORAGE**

- Precautions for safe handling**
- Avoid contact with skin, eyes or clothing
  - Avoid breathing fumes from hot material
  - Hydrogen sulfide, an extremely flammable, colorless, highly toxic gas is emitted from heated asphalt and may accumulate in storage tanks or bulk transport containers.
  - Handle in accordance with good industrial hygiene and safety practice
- Conditions for safe storage, including any incompatibilities**

- Storage Conditions**
- Keep in a dry, cool and well-ventilated place
  - Assure proper ventilation of storage or shipping containers to prevent accumulations of hazardous concentrations of off-gassed hydrocarbon gas or H<sub>2</sub>S

Eye contact may cause severe irritation, redness, tearing, and blurred vision. If ingested, may cause mouth, throat and gastrointestinal tract irritation and upset with possible nausea, vomiting and diarrhea. Aspiration of petroleum distillates into the lungs can cause severe chemical pneumonitis that can be fatal. See Section 8 for exposure controls.

**Delayed Health Effects** Prolonged or repeated skin contact may result in dryness and irritation of the skin. Prolonged contact with clothing saturated in petroleum distillates can cause second degree burns. Long term skin exposure to asphalt can increase sensitivity to the sun, and may cause discoloration.
